(U) portionmarkdown Example Output

Figure is UNCLASSIFIED

```
def hello():
    print("Example")
```

Figure is UNCLASSIFIED

Figure is CUI

```
if __name__ == "__main__":
    hello()
```

Figure is CUI

(U) Example Table

(CUI) Example paragraph for the table section.

Table is CUI

Column A	Column B	Column C
Example	This cell has a longer piece of text that should wrap to at least two rows in the rendered PDF output	Example
Example	Example	Another cell with enough text to demonstrate multi-line wrapping behavior in a table

Table is CUI

(U) Example Link, Footnote & Line Break

(U) See the portionmarkdown repo[1] for documentation.

(U) This line has a `<br>` line break
right here in the middle.

(U) Example Ordered List

1. **(TS//ACCM-EXAMPLE)** Example step one
2. **(TS//ACCM-EXAMPLE)** Example step two
3. **(TS//ACCM-EXAMPLE)** Example step three

(U) Example Blockquote

> **(U)** There is a `<pagebreak />` below this blockquote.
