(U) portionmarkdown Example Output

Figure is CUI

```
if __name__ == "__main__":
    hello()
```

Figure is CUI

Figure is TOP SECRET//ACCM-EXAMPLE

```
def hello():
    print("Example")
```

Figure is TOP SECRET//ACCM-EXAMPLE

(U) Example Table

Table is CUI

Column A	Column B	Column C
Example	This cell wraps to at least two rows in the rendered PDF output	Example
Example	Example	Another cell demonstrating multi-line wrapping

Table is CUI

(U) Example Link, Footnote & Line Break

- **(U)** See the portionmarkdown repo[1] for documentation.
- **(U)** This line has a <br> line break
right here in the middle.
- **(U)** Inline `code`, **bold**, and *italic* formatting.
